11-in-1 Premium USB C Hub with Ethernet, HDMI, VGA, SD/TF Card Reader & Power Delivery 3.0

1 * Type-C Charging Port	1 * Gigabit RJ45 Port
2 * HDMI 4K Output Port	1 * VGA port
1 * SD Card Slot	1 * Micro SD Card Slot
2 * USB 3.0 Type-A Ports	2 * USB 2.0 Type-A Ports

Type-C Charging Port: Supports PD(power delivery) charging via USB-C female port(Unidirectional), Max. 60W power pass through, Power voltage identifies intelligently between 14.5V/20V.

2 * HDMI 4K Output Port: Up to 4K@30Hz.

SD Card Slot: Super speed up to 5Gbps.

5Gbps data transferring rate and 4.5W (5V)

Supported Systems:

up to 46.0249082

- 1.Plug in your external peripheral onto the hub.
- 2.Plug in the apple Power Adapter into the USB C port of hub.
- 3.Plug the hub all the way into the usb c ports of your Macbook Pro or other Type-C devices.

Supports extend mode - the computer and the external monitor are the same or different. Only the windows system computer can support this mode. The Display Setting need to be set at Extend these displays.

If your laptop is apple, you need to change your laptop setting by clicking the Mirror Displays. Our usb c hub would support Mac to extend two monitor through the HDMI and VGA ports at the same time.

- 1) Asus Transformer3 Pro
- 2) Samsung TabPro S
- 3) Wacom mobilestudio pro 16
- 4) Nexus 6P
- 5) Nintendo Switch
- 6) iPad Pro

1) If your MacBook is the first time to use the ethernet port, Macbook needs to be set up as follows:

Click 'System Preferences' - 'Network', click "+" and selecting usb 10 / 100 / 1000 LAN to create an application (click on the app to show usb 10 / 100 / 1000 lan green, connected successfully). Macbook accessed through wired internet at this time.

<https://www.youtube.com/watch?v=-nmok6NDjyc>

3) The USB ports don't support data transfer with the iPad Pro for the compatibility.

4)For the monitor issue, could you try the process as below:

If your laptop is apple, you need to change your laptop setting by clicking the Mirror Displays. Our usb c hub would support Mac to extend two monitor through the HDMI and VGA ports at the same time,

If your laptop is window systems, you need to change the display settings to Duplicate these displays by clicking right.

5) The SD card slot and the TF card slot can't be used on the hub simultaneously.

6) All resolutions of HDMI become 1080p@60hz once you use the VGA Port no matter you use 1 HDMI Port or 2 HDMI ports at the same time.
