

- 1) Please refer to <https://www.synaptics.com/products/displaylink-graphics/downloads> to download/update the driver before using the product.
  - 2) Select "INDIVIDUAL INSTALLERS" or "CORPORATE INSTALLERS">>"Windows" or "MacOS"
  - 3) Open and Download DisplayLink USB Graphics Software
- NOTE: Before downloading, please check the operating system model of your PC in "Settings>>About" and then select the appropriate displaylink version to download.

The screenshot shows the Synaptics website's "Supported Operating Systems" page. At the top, there is a navigation bar with "PRODUCTS", "APPLICATIONS", "TECHNOLOGY", the Synaptics logo, and "DOWNLOADS", "COMPANY", "CAREERS" with a search icon. The main heading is "Supported Operating Systems". Below this, there are two sections: "INDIVIDUAL INSTALLERS" and "CORPORATE INSTALLERS".

**INDIVIDUAL INSTALLERS**

- Windows (represented by the Windows logo)
- macOS (represented by the Mac logo)
- Android (represented by the Android logo)
- Chrome OS (represented by the Chrome logo)
- Ubuntu (represented by the Ubuntu logo)

**CORPORATE INSTALLERS**

- Windows (represented by the Windows logo)

## Displaylink USB Graphics Software for Windows

The screenshot shows the Synaptics website's "Windows Driver Downloads" page. The navigation bar is identical to the previous screenshot. The main heading is "Windows Driver Downloads".

Here you can download drivers for DisplayLink® USB graphics chipsets incorporated in your dock, adapter or monitor. We recommend to update to the latest driver to address any potential security issue, fix bugs, improve performance and add new features.

Notes:

1. Your Original Equipment Manufacturer (OEM) may also provide software for your specific monitor, dock or adapter that differs from the DisplayLink releases. Please check their website for details.
2. Windows 10 S products using DisplayLink technology will get their device drivers either from OEM pre-installation or from Windows Update.

**Latest Official Drivers**

### Installation:

- 1) Please refer to <https://www.synaptics.com/products/displaylink-graphics/downloads> to download/update the driver before using the product.
- 2) Select "INDIVIDUAL INSTALLERS" or "CORPORATE INSTALLERS" >> "Windows"
- 3) Open and Download DisplayLink USB Graphics Software for Windows .exe

## DisplayLink USB Graphics Software for MAC OS

The screenshot shows the Synaptics website's product page for DisplayLink macOS Software. At the top, there is a navigation bar with 'PRODUCTS', 'APPLICATIONS', and 'TECHNOLOGY' on the left, the Synaptics logo in the center, and 'DOWNLOADS', 'COMPANY', and 'CAREERS' on the right. Below the navigation bar is a horizontal menu with buttons for 'Windows', 'macOS' (highlighted in blue), 'Android', 'Chrome OS', 'Ubuntu', and 'Corporate Installers for Windows'. The main content area features a large blue header 'DisplayLink macOS Software' followed by a paragraph describing DisplayLink Manager. Below this is a dark blue button 'DisplayLink Manager' with a minus sign. Underneath is a white box containing the product name 'DisplayLink Manager Graphics Connectivity', a 'Download' button, and 'Release Notes' link. It also lists compatibility: 'Monterey 12, Big Sur 11, Catalina 10.15' and 'Release: 1.5 | Sep 8, 2021'. To the right of this box is another dark blue button 'Legacy Releases' with a plus sign. On the far right, there are two vertical panels: 'FIND OUT FIRST ABOUT NEW RELEASES' with a 'Get Notifications' button, and 'INFORMATION ABOUT MACOS 10.15' with a paragraph of text.

### Installation:

- 1) Refer to <https://www.synaptics.com/products/displaylink-graphics/downloads> to download/update the driver before using this Product.
- 2) Select "INDIVIDUAL INSTALLERS" >> "macOS"
- 3) Open and Download DisplayLink Manager Graphics Connectivity .pkg

**NOTE:** When asked whether you agree to install and enter the password, please click "Agree" and enter your fingerprint or password to install. Otherwise, the driver will fail to install.

Enable "Screen Recording" to allow the DisplayLink Manager app to capture pixels and send them to your USB peripheral:

- 1) Please select "Privacy" tab.
- 2) Navigate to "Screen Recording" in the list on the left.
- 3) Then tick the "Screen Recording" permission for DisplayLink Manager.

**NOTE:** For Apple Silicon (M1), it takes a higher level of protection of customer privacy requirements. Macbook with M1 chip, requires the user to permit "Screen Recording" in order for DisplayLink devices to work properly. The message is generated by the OS and the screen is not actually being recorded by DisplayLink. Approving it enables the DisplayLink driver to access the pixels it needs to render a mirrored or extended screen and send the pixels over USB from your computer to the DisplayLink display. DisplayLink Manager does not store or record any screen content.
